FLOOD CONTROL ENGINEERING

Flood Control and Drainage Design Guidance Manual

July 1, 2019

The Flood Control and Drainage Design Guidance Manual is provided as a guide to implement flood control and interim drainage policies and standards for the Gila River Indian Community. The processes contained within the manual will provide those preparing drainage studies, plans, design reports, and construction drawings with the philosophies, policies, and minimum standards that will protect the People, culture, land and environment of the Gila River Indian Community while meeting minimum Federal regulations.

The full manual is available upon request from Land Use Planning and Zoning.
